Summary

Engineering leader with expertise in front-end development and team management. Passionate about using cutting-edge web technologies to deliver user-centric solutions. With a strong technical background in JavaScript/TypeScript, Angular, and other modern web frameworks, I am dedicated to empowering and mentoring teams to deliver high-quality products. Maintainer of LostGrid, a widely recognized open-source grid for PostCSS.

Work Experience

Sr. Engineering Manager

October 2022 - Current

Platform Science - Remote

- Manages two engineering teams focused on a Navigation Android application and Fleet Solutions core application.
- Responsible for enabling fleets to leverage their telematics data through interactive maps, filters, and via Looker for advanced analytics.
- Collaborates with a diverse group of engineers and product leaders across the world.
- Maintains a user-centric "design mind" to prioritize customer requirements and needs.
- Partners across engineering and product teams to support broader needs of the company.

Engineering Manager

October 2021 - October 2022

Stitch Fix - Remote

- Led the dynamic content and landing/home experience for logged-in users.
- Utilized React/TypeScript, Ruby on Rails, and GraphQL for application development.
- Partnered with product managers to translate high-level requirements into actionable user stories.

Manager, Technology

April 2019 - October 2021

XPO Logistics (LTL Division) - Portland, Oregon

- Successfully migrated the customer website from legacy systems to modern Java APIs with Angular/TypeScript.
- Managed a diverse team of 30 professionals across five time zones.
- Owned UI component libraries utilized by engineers across the whole company.
- Delivered solutions supporting over \$4B annual revenue with applications serving over 100,000 customers.
- Supported customer and partner integrations such as TMS or custom applications with XML and REST endpoints

Sr. Software Developer

May 2018 - April 2019

XPO Logistics (LTL Division) - Portland, Oregon

- Developed scalable Angular applications for international user bases.
- Collaborated with UX teams to design intuitive user interfaces and experiences.

Software Developer

October 2016 - May 2018

Veelo - Portland, Oregon

- Prioritized and delivered new features in collaboration with the product and management.
- Worked across platforms including Salesforce, Web, and Gmail/Outlook.

Web Development/Frontend Lead

April 2015 - September 2016

NaturalPoint - Corvallis & Remote

- Modernized the front-end stack while ensuring PCI compliance.
- Played a pivotal role in all development phases, from Perl to data-center support.

Open Source Contributions

- LostGrid Maintainer: Open-source grid for PostCSS with over 7 million downloads.
- Benton County: Develops scheduling software and student career pathway success tools.
